

Year: 2019-2020

Project title: "Earth Emergency: Meeting, Change, Environment"

Leader: Union of Municipalities Savena Idice

Project description

The general objective is to encourage the Union of Municipalities Savena Idice's citizens to be interpreters, through their creativity, of the Sustainable Development Goals set by the 2030 Agenda, transmit their contents and contribute to their growing knowledge.

This project intends to build a participatory communication campaign involving in particular the younger generations.

Environmental education is a "process whereby individuals acquire awareness and attention to their environment; they acquire and exchange knowledge, values, attitudes and experiences, as well as the determination that will enable them to act, individually or collectively, to solve current and future environmental problems "; in the words of the International Union for Conservation of Nature, Commission on education and communication (IUCN) we grasp the fundamental importance of environmental education as a tool for changing behaviors and conscious choices models, oriented towards sustainable development.
