

Proponent: Comune di Santarcangelo di Romagna

Co-proponent: COOPERATIVA SOCIALE CENTO FIORI A R.L.

Project : Santarcangelo x il Clima

Project description:

The main goal of the project is to promote knowledge, critical understanding and implementing of the AGENDA 2030 at a local level with a focus on SDG 13 and SDG 11. Both citizens and policy makers seem to be barely informed about these issues and about connections between the local and global dimension.

With the activities of this project the proponent intends to involve citizens and groups of migrants in a path of participative and joint reflection on the above mentioned goals and to understand which actions have to be taken on a local level to reach them, with particular reference to climate, gender and migration issues.

Three main activities are foreseen:

- A launch seminar with the activation of a permanent social media forum to generate a discussion and collect ideas among citizens on the themes of the project;
- A video-documentary with 20 citizens and immigrants interviews on issues related to the Agenda 2030, with a prominent focus on climate change
- A final public event called "Santarcangelo per il clima", structured as follows: a public presentation of the carried video interviews; a summary of the ideas, comments and contributions provided by discussions on social media; a presentation of the 2019-2024 Programme Lines of the Maire, with particular reference to environmental and gender aspects and definition of bottom-up actions, in addition to the above-mentioned Programme Lines.

In the communication campaign aside the above-mentioned activities, an APP to measure the people's daily behaviour sustainability and a kit of gadget to foster the reuse will be realized.

At the end of the project at least 10 public officers with different roles, 20 representative of Civil Society Organizations and at about 10.000 citizens will be directly or indirectly reached. They will have more information and knowledge to assess their daily performance against the objectives of Agenda 2030.
