

LIFE11 ENV/IT/000243 RII Project Hydraulic-environmental integrated requalification of water streams belonging to the piedmont belt of Emilia-Romagna Region

Rio Monticelli

Rio da Corte

Rio Bianello

Rio Lavezza

Rio Quaresimo

Rio Enzola

Rio Arianna

Rio Bertolini

Rio Bottazzo

Critical issues

High flood risk, poor water and environmental quality

Objectives

Testing of innovative strategies for land management by carrying of measures to bring the stream in a system safer and closer to the natural one and improve water quality.

Development of new forms of incentives and compensation to involving farmers in actions to reduce flood risk.

Involvement, information and awareness of stakeholders and local communities.

Implementation of a participatory process for the choice of actions in the area.

Monitoring of the impacts of project activities and results dissemination.

Budget: 1,200,000.00 €
EU co-financing 50%
length: 9/2012 - 3/2016
